## Navigate with agility with the Anapurna Ciervo family

**Inspired by the nimbleness of a slender deer, the Anapurna Ciervo hybrid printer family navigates a broad spectrum of printing tasks with ease. The Ciervo name – Spanish for ‘deer’ - captures the spirit of these machines: alert, swift, and sure-footed as a stag.**

### **The Ciervo Story: A Swift Evolution**

Agfa’s Ciervo family has faithfully served print service providers for two decades, but recent years have seen the herd swell rapidly. Last year, Agfa released the Anapurna Ciervo H3200, and quickly followed up with two more innovations – the H2500, now touring every major show this year, and the compact H2050. Each new Ciervo model brings fresh energy to the field, granting customers a full suite of tools to meet any challenge.

### **Tackle any Terrain**

The Ciervo family – comprising the H2050, H2500, and H3200 models – delivers unmatched agility across rigid and flexible substrates. Whether you’re a nimble print shop or a powerhouse producer, these printers leverage UV LED curing and six-color plus white inks for vibrant, eco-conscious outputs. Continuous board feeding and optional corrugated feed guides expand your range to include packaging and POS displays, while Thin Ink Layer technology minimizes ink consumption without sacrificing the richness of your prints.

### **Strength in every stride**

- H2050: The smallest in the herd, this 2.05m model is compact yet powerful, balancing footprint and productivity with a top speed of 133 m<sup>2</sup>/h.
- H2500: With a 2.5m width and redesigned print engine, this model is the workhorse of the group, handling everything from banners to coated textiles at speeds up to 169m<sup>2</sup>/h.
- H3200: The 3.2m powerhouse excels in large-format applications, offering speeds up to 192 m<sup>2</sup>/h and seamless roll-to-roll performance.

Every Ciervo is built with UV LED technology for sustainable operation. Their integrated workflow solutions, supported by Agfa's Asanti software, streamline production and ensure consistent, high-quality results.

### **Safety Benefits**

Agfa has made operator well-being a top priority. The new Ciervo models feature a protective hood that covers the belt and shuttle, shielding operators from moving parts and creating a safer working environment. This protective closure keeps hands out of harm's way and quiets the noise of production.

### **The Herd Expands**

With the introduction of the new Anapurna Ciervo H2050, the Ciervo family now offers a complete herd of solutions, each engineered to thrive in diverse print environments.

**Agfa's Ciervo family is ready to help you navigate with agility and anticipate any challenge. Visit Agfa at Hall 27 (D60 and D70) at FESPA Global Print Expo 2025 and experience the agility, power, and versatility of the Ciervo herd firsthand.**

**ENDS**

Social media

Our Anapurna Ciervo family has redefined hybrid printing for two decades, offering print service providers the ideal blend of speed, versatility, and sustainability. From the compact H2050 to the 3.2m H3200 powerhouse, each model tackles rigid or flexible substrates with UV LED precision and Thin Ink Layer efficiency.

The herd is ready to elevate your print game – catch us at FESPA 2025 (Hall 27, D60/D70) to see why Anapurna remains the industry's agile giant.
