May 2025

Agfa charges ahead with the Jeti Tauro H3300 XUHS

Agfa's new Jeti Tauro H3300 XUHS hybrid press is purpose-built to tackle any print job – leading the pack with raw power, intelligent automation, and unmatched versatility.

Power Meets Precision

The Tauro H3300 XUHS is Agfa's fastest hybrid press to date. Its robust engineering thrives in continuous, multi-shift operation, maintaining impressive productivity with minimal maintenance. Whether you're printing banners, posters, exhibit graphics, or POP, the Tauro XUHS is always hungry for more.

Fierce Performance, Award-Winning Quality

- Up to 1,280 m²/h of raw speed
- 12 rows of print heads for maximum throughput
- 4 or 7 color configurations, including options for extra redundancy in dark colors and enhanced light/mid-tones for razor-sharp image quality
- Varnish option for prints for enhanced brilliance and impact, and a primer option for difficult media
- Extended vacuum and automated, motorized media feed guides for effortless cardboard and specialty media handling

With Agfa's signature UV LED-curable inks and advanced color management, the Tauro XUHS delivers a wide color gamut, deep solid colors, and a perfectly neutral grey balance. Expect offset-like print quality, with fine details and smooth gradations – even at the fastest speeds.

Automation Unleashed

The Tauro H3300 XUHS is equipped with cutting-edge automation to keep your production running at full sprint. From automatic board feeders to fully automated loading and unloading systems – alongside robotic media handling through its MAX Bots - this machine can be optimized for rigid, sheet, or roll media – whatever your need.

- Multiple automation options for long runs and multi-board jobs
- Automated motorized media feed guides for consistent, hands-off operation
- Extended autonomy with large ink tanks and robust engineering

The Tauro XUHS model showed at FESPA 2025 comes equipped with MAX Flex RTR and a MAX Bot, demonstrating ultimate flexibility. This set-up is the ideal solution for print service providers that handle multiple substrates and applications.

Built for Versatility

The Tauro XUHS is built to perform no matter the media, handling rigid and flexible materials from self-adhesives and backlit films to niche media like wood and glass. Its versatility makes it the perfect companion for large print service providers looking to expand their territory and capture new markets.

This machine combines with the Tauro 30 ink set to provide superior performance on corrugated cardboard and rigid sign applications. These inks are built for brilliance and boast excellent jetting reliability as well as high bending resistance up to 180° without cracking, offering a solution for even the most difficult substances. The inks are also formulated with safety and the environment in mind, helping printers take a step towards compliance with S&HE regulations.

Dieter Jancart, Segment Manager High-End Printing Systems at Agfa said: “The Jeti Tauro H3300 XUHS redefines industrial-scale hybrid printing, merging blistering 1,280 m²/h speeds with offset-grade precision to empower print providers in conquering complex substrates and high-margin applications. Its intelligent automation and ink ecosystem future-proof operations, letting businesses dominate rigid, flexible, and specialty media markets with unmatched quality and uptime.”

Discover the Jeti Tauro H3300 XUHS at FESPA Global Print Expo 2025. Visit Agfa at Hall 27 (D60 and D70) to explore the next evolution of wide format printing.

Notes to editors

About Agfa

The Agfa-Gevaert Group is a leading company in imaging technology and IT solutions with over 150 years of experience. The Group operates through three divisions: Radiology Solutions, Healthcare IT, and Digital Print & Chemicals. They develop, manufacture, and market analog and digital systems for the healthcare sector, for specific industrial applications, and for the printing industry. In 2024, the Group achieved a turnover of € 1,138 million.

About Agfa's Digital Printing Solutions

Agfa's Digital Printing Solutions aims to advance the use of inkjet printing technology across diverse industries, helping businesses become more versatile, efficient, and sustainable. By understanding the unique needs and challenges of each sector, Agfa partners with its customers to deliver innovative printing solutions.

Agfa offers a comprehensive range of high-quality inkjet printers, inks, software, and services. These products can be provided as fully integrated solutions or as customized components within larger production workflows, ensuring exceptional quality, productivity, and cost-effectiveness. With global service and support, Agfa helps businesses achieve outstanding printing results and drive growth.
