## Agfa makes waves in inkjet printing with the SpeedSet Orca 1060

Agfa, a global leader in inkjet printing technology, encourages FESPA 2025 attendees to discover the offset-like precision of the SpeedSet Orca 1060 water-based inkjet press at this year's FESPA Global Print Expo. Built to thrive in the most demanding environments, this B1-sized titan merges digital innovation with Agfa's more sustainable engineering – proving that true power flows naturally.

### Dive into high performance printing

With a killer speed of 11,000 B1 sheets/hour, the SpeedSet Orca 1060 surges ahead, navigating short runs and on-demand production with agility. Its 1060mm x 750mm sheet size and 0.15-2mm substrate range – from folding carton to micro-flute – enables it to tackle diverse almost any media required.

### Powerful by nature

The SpeedSet Orca 1060 anchors Agfa's commitment to more sustainable, high-speed digital packaging. As regulations like the EU's PPWR drive demand for recyclable solutions, the Orca's food-safe inks and minimal waste output position you ahead of the swell.

- **Offset-like precision:** Harness 1200 dpi resolution and an expansive colour gamut for razor-sharp text and vibrant graphics, rivalling traditional offset quality.
- **Low ink consumption:** Digital primer and varnish application slashes ink usage while enhancing colour depth, ensuring every drop makes an impact.
- **Seamless automation:** Swift 5-minute media changeovers, a  $\pm 0.2$  mm media registration system, and a 1,500 kg-capacity feeder/stacker keep production flowing.

### Ride the wave of innovation

The SpeedSet Orca 1060's 10-bar colour system (CMYK + optional colours, primer, varnish) and integrated inspection cameras ensure flawless results, while Agfa's Asanti

workflow software synchronizes with ERP/MIS systems, automating your journey from design to delivery.

Richard Cotterill, Global Sales Manager Packaging at Agfa said: “This fully digital packaging printing press merges the robustness and print excellence of an offset press with the compelling attributes of inkjet printing. It offers offset-like print quality yet boasts shorter set-up times, reduced material waste and efficient variable data printing. On top of that, with its killer speed of 11,000 B1 sheets per hour, the SpeedSet Orca enables packaging converters to make their current operations more efficient and more cost-effective.”

**Agfa’s SpeedSet Orca 1060 is ready to transform your wide format digital printing. Visit Agfa at Hall 27 (D60 and D70) at FESPA Global Print Expo 2025 to discover how the Orca can help you dive into a sea of opportunities.**

## **Notes to editors**

### **About Agfa**

The Agfa-Gevaert Group is a leading company in imaging technology and IT solutions with over 150 years of experience. The Group operates through three divisions: Radiology Solutions, Healthcare IT, and Digital Print & Chemicals. They develop, manufacture, and market analog and digital systems for the healthcare sector, for specific industrial applications, and for the printing industry. In 2024, the Group achieved a turnover of € 1,138 million.

### **About Agfa’s Digital Printing Solutions**

Agfa’s Digital Printing Solutions aims to advance the use of inkjet printing technology across diverse industries, helping businesses become more versatile, efficient, and sustainable. By understanding the unique needs and challenges of each sector, Agfa partners with its customers to deliver innovative printing solutions.

Agfa offers a comprehensive range of high-quality inkjet printers, inks, software, and services. These products can be provided as fully integrated solutions or as customized components within larger production workflows, ensuring exceptional quality, productivity, and cost-effectiveness. With global service and support, Agfa helps businesses achieve outstanding printing results and drive growth.
