**Agfa prepares to ‘unleash the beasts’ at FESPA Global Print Expo 2025
with two new inkjet powerhouses**

Agfa, a global leader in inkjet printing technology, is set to make a powerful impact at this year’s FESPA Global Print Expo by unveiling two new state-of-the-art inkjet printing systems for its animal-themed portfolio.

Agfa’s latest launches – the **Jeti Tauro H3300 XUHS** and **Onset Panthera FB3216** – are designed to empower print service providers with solutions that are ‘Powerful by Nature’.

Visitors to this year’s FESPA event in Berlin can visit Agfa in Hall 27, Booths D60 & D70 to see the new machines first-hand, discover other leading solutions from the company’s inkjet portfolio, and join the 20-year anniversary celebrations for the Anapurna Ciervo range.

Arnaud Calleja, Vice-President Digital Printing Solutions at Agfa, said: “FESPA 2025 will feel the roar of innovation from Agfa with new inkjet printers that embody our ‘Powerful by Nature’ philosophy. These machines are engineered to deliver unmatched performance, versatility, and automation for print service providers ready to conquer new challenges and thrive in any environment. We invite visitors to our stand to experience firsthand how Agfa’s innovations can empower print businesses and unleash their full potential.”

The brand-new **Jeti Tauro H3300 XUHS** is the biggest, fastest, and boldest printer in the Tauro family. This rugged hybrid press is engineered for 24/7 productivity and outstanding quality on both rigid and flexible materials. Its fierce performance, low ink consumption, and advanced automation options, combined with automated motorised media feed guides and print speeds up to 1.280m²/h, cement its credentials as the fastest and most versatile hybrid press in Agfa’s lineup.

The new **Onset Panthera FB3216** is the only true flatbed high-productivity inkjet printer on the market, built for speed, precision, and smart automation. Its advanced LED curing capability supports rapid, high-quality prints, striking gloss levels and minimal energy usage, making it ideal for high-volume POS, retail graphics, and corrugated packaging.

Visitors to Agfa's booth can also discover other inkjet printing innovations, including the **Jeti Bronco H3300** – a wide-format hybrid printer engineered for digital printers seeking versatility, productivity, and top-tier print quality. With a 3.3-metre print width, UV LED capability, and a six-colour plus white ink set, this machine offers the flexibility to tackle a broad spectrum of applications.

Agfa also recently expanded its **Anapurna Ciervo** range by introducing the H2500 and versatile, compact new H2050 models, and FESPA 2025 attendees are encouraged to visit Agfa's exhibit to discover more about the growing Anapurna herd. Agfa is celebrating the range's 20th anniversary at the Global Print Expo and visitors to its booth can see the H2500 machine first-hand.

Agfa will also demonstrate the latest version of its Asanti workflow software, designed to streamline the print process and make it more cost-efficient. Asanti 7 offers smart nesting and layout tools that help minimise media waste, and its sustainability tracking feature offers carbon footprint calculation by seamlessly integrating with Dataline's MultiPress MIS/ERP system.

In addition to an overview of Agfa's latest sustainability commitments, visitors seeking sustainable print solutions can discover the latest in more sustainable media from its partners including Holmen, Pongs, Brett Martin, Kohlschein, Beelite, and Smurfit Westrock. The display will feature a striking range of printed samples as well as the chance to discover **SYNAPS**, a range of coated polyester media offering tear and water resistance designed for premium applications that need a robust and attractive stock.

Don't miss your chance to see Agfa's latest innovations for yourself at FESPA Berlin from 6-9 May at Messe Berlin GmbH.
