Agfa wins triple accolade for Jeti Tauro H3300 XUHS at EDP Awards

Mortsel, Belgium – May 8, 2025 – Agfa has taken home a trio of EDP (European Digital Press Association) Product Awards for its new hybrid press, the Jeti Tauro H3300 XUHS. The powerhouse press received top honors in the engine, automation and ink categories, underlining its game-changing potential in high-volume wide-format inkjet printing.

The Jeti Tauro H3300 XUHS impressed with raw performance and versatility, showcasing production speeds up to 1,280 m²/h, 12 rows of print heads, and robust engineering for 24/7 multi-shift operation. The result is stunning, offset-like quality across a wide range of media - from signage to cardboard and specialty substrates.

“Winning in three distinct categories is a powerful validation of our commitment to innovation,” said Arnaud Calleja, Vice-President Digital Printing Solutions at Agfa. *“It perfectly reflects the strength of our teams, the forward-looking nature of our technology, and our ambition to lead the industry into a smarter, more sustainable future”.*

Its hybrid design, 4 or 7-color configurations (including varnish), and extended vacuum with automated feed guides make it the ideal press for printers seeking peak productivity and uncompromised image quality.

In the automation category, Agfa was awarded for the MAX Bots robots on the Jeti Tauro H3300 XUHS. This robotic system for loading and unloading reduces manual handling while maximizing throughput. In combination with the Flex RTR system, the MAX Bots let print service providers switch seamlessly between rigid and roll media, empowering them to run complex, mixed-media jobs with minimal intervention and maximum cost-efficiency.

The machine combines with the Tauro 30 ink set, designed for high performance on corrugated cardboard and rigid sign materials. It offers consistent jetting reliability, even at higher head gaps, and provides bending resistance up to 180° without cracking. The inks also help reduce costs through low consumption rates, while maintaining a wide color gamut.

“The combination of speed, precision, and automation in the Jeti Tauro H3300 XUHS raises the bar for industrial inkjet printing” said Dieter Jancart, Segment Manager High-End Printing Systems at Agfa. *“With its advanced robotics, it helps customers handle demanding production schedules while reducing manual labor and error rates. This press isn’t just keeping up with market demands - it’s setting new standards for what print service providers can achieve in terms of quality, efficiency, and versatility”*.

Visitors to FESPA Global Print Expo 2025 (Berlin, 6 - 9 May) can get hands-on with the award-winning Jeti Tauro H3300 XUHS in Hall 27 (Booths D60 & D70).

About Agfa

The Agfa-Gevaert Group is a leading company in imaging technology and IT solutions with over 150 years of experience. The Group operates through three divisions: Radiology Solutions, Healthcare IT, and Digital Print & Chemicals. They develop, manufacture, and market analog and digital systems for the healthcare sector, for specific industrial applications, and for the printing industry. In 2024, the Group achieved a turnover of € 1,138 million.

About Agfa’s Digital Printing Solutions

Agfa’s Digital Printing Solutions aims to advance the use of inkjet printing technology across diverse industries, helping businesses become more versatile, efficient, and sustainable. By understanding the unique needs and challenges of each sector, Agfa partners with its customers to deliver innovative printing solutions.

Agfa offers a comprehensive range of high-quality inkjet printers, inks, software, and services. These products can be provided as fully integrated solutions or as customized components within larger production workflows, ensuring exceptional quality,

productivity, and cost-effectiveness. With global service and support, Agfa helps businesses achieve outstanding printing results and drive growth.
