**Two decades of unmatched agility:
Celebrate 20 Years of Anapurna with the Ciervo family**

For twenty years, Agfa's Anapurna range has been synonymous with performance, agility, and reliability in hybrid inkjet printing. In 2025, as the family celebrates its 20th anniversary, the Anapurna Ciervo models proudly carry this legacy forward, embodying the versatility and speed of their namesake.

The Ciervo story: 20 years in motion

From its debut in 2005, the Anapurna range has evolved continuously to meet the fast-changing needs of print service providers across the globe. The Ciervo series – first introduced in 2024 – marks the latest chapter in this story. Within one year, the herd has expanded to include three hybrid machines: the compact **H2050**, the versatile **H2500**, and the high-output **H3200**. Each is engineered to help printers adapt swiftly to new challenges, making the Ciervo family a milestone achievement in Agfa's two decades of inkjet innovation.

Tackle any terrain

Whether producing short-run signage, packaging, or large-format graphics, the Anapurna Ciervo family offers sustainable performance across both rigid boards and flexible rolls:

- **UV LED curing** for energy efficiency and versatile media handling
- **Six-colour plus white ink configuration** for vibrant output, with thin ink layer technology ensuring high quality while reducing ink consumption
- **Continuous board feeding and corrugated feed guides** to expand into applications such as packaging, POS displays, and display graphics

Strength in every stride

- **H2050:** Compact yet powerful at 2.05 m wide, ideal for space-conscious shops, delivering speeds up to 133 m²/h
- **H2500:** A workhorse at 2.5 m, combining speed (up to 169 m²/h) with improved productivity across banners, coated textiles, and more
- **H3200:** The 3.2 m flagship, built for heavy-duty production and large-format output, achieving up to 192 m²/h with effortless roll-to-roll capability

Every Ciervo is powered by **Agfa's Asanti workflow software**, ensuring seamless job preparation, colour consistency, and optimised productivity.

Built for safety and sustainability

Operator safety and comfort sit at the core of the Ciervo design. A protective hood now shields the shuttle and transport belt, keeping moving parts safely enclosed while also reducing operational noise. When combined with UV LED curing and thin ink layer technology, the Ciervo family effortlessly balances productivity, sustainability, and well-being in the workplace.

Paul Fitch, Head of Sales UK, Ireland & Nordics at Agfa, said: "This year we're celebrating two decades of continuous evolution in the Anapurna range. The Ciervo family perfectly embodies what Anapurna has always stood for: versatility, quality, and resilience. At The Print Show 2025, we're proud to bring the H3200 to Birmingham and showcase why Anapurna continues to be the trusted choice for so many print providers worldwide."

Agfa will showcase the Anapurna Ciervo H3200 hybrid printer live at The Print Show 2025, NEC Birmingham, 23–25 September, stand P200. Visitors can also explore the Anapurna FB2540i flatbed and Anapurna H1650i LED printers, while Agfa's expert team will be on hand to discuss how its technologies can support businesses in navigating today's print landscape with agility.

Notes to editors

About Agfa

The Agfa-Gevaert Group is a leading company in imaging technology and IT solutions with over 150 years of experience. The Group operates through three divisions: Radiology Solutions, Healthcare IT, and Digital Print & Chemicals. They develop, manufacture, and market analog and digital systems for the healthcare sector, for specific industrial applications, and for the printing industry. In 2024, the Group achieved a turnover of € 1,138 million.

About Agfa's Digital Printing Solutions

Agfa's Digital Printing Solutions aims to advance the use of inkjet printing technology across diverse industries, helping businesses become more versatile, efficient, and sustainable. By understanding the unique needs and challenges of each sector, Agfa partners with its customers to deliver innovative printing solutions.

Agfa offers a comprehensive range of high-quality inkjet printers, inks, software, and services. These products can be provided as fully integrated solutions or as customized components within larger production workflows, ensuring exceptional quality, productivity, and cost-effectiveness. With global service and support, Agfa helps businesses achieve outstanding printing results and drive growth.
