May 2026

Navigate with agility with the Anapurna Ciervo family at FESPA 2026

With the speed and agility of its namesake, Agfa's Anapurna Ciervo family bounds into FESPA Barcelona this May as the H2500 model brings a versatile wide-format hybrid solution to the global print expo. Built for sign shops and digital printers that need to stay nimble while chasing growth, the Ciervo line combines compact design and high performance in one lean, efficient package.

Swift and sure-footed

The Ciervo name – Spanish for 'deer' – perfectly captures the spirit of the Anapurna Ciervo range. Comprising the H2050, H2500, and H3200 models, this compact portfolio adds a compact footprint to Agfa's inkjet family that does not compromise efficiency, sustainability, or versatility.

Designed for businesses that move quickly between rigid and flexible substrates, the Ciervo herd shines across multiple substrates, using UV LED curing and six-color plus white inks to produce vibrant, high-impact graphics. Continuous board feeding and multiple board printing of up to four boards simultaneously keep production moving, with optional corrugated feed guides, print service providers can tackle any task, including packaging and POS displays.

Intelligent efficiency

Agfa's Thin Ink Layer technology keeps ink consumption to a minimum, supporting cost-effective production and lower environmental impact. The family also uses GREENGUARD Gold-certified inks, which deliver a wide color gamut while meeting strict environmental standards. Borderless printing reduces the need for post-finishing, helping streamline workflows and shorten turnaround times.

With robust media handling, protective hoods and smart design features, the Ciervo family is engineered to work long hours without compromising operator safety or print consistency. Cool operating UV LED lamps open the door to thin and heat-sensitive materials while keeping power and heat-related constraints in check.

Discover the herd

H2050: This compact 2.05 m printer saves space on the pressroom floor while still delivering top speeds up to 133 m²/h.

H2500: On display at FESPA 2026, the H2500's 2.5m width and speeds of up to 169m²/h makes it ideal for bolstering productivity.

H3200: The largest Anapurna Ciervo model excels in large-format applications, with a 3.2 m width and speeds up to 130 m²/h in high-productivity mode.

Make the leap at FESPA 2026

Agfa invites visitors to witness the Anapurna Ciervo H2500 at FESPA Global Print Expo 2026. Visit Agfa at Hall 3, booth D100 to see live demonstrations and discover how the Ciervo provides the versatility to approach a wide range of print jobs.

Notes to editors

About Agfa

The Agfa-Gevaert Group is a leading company in imaging technology and IT solutions with over 150 years of experience. The Group operates through three divisions: Radiology Solutions, Healthcare IT, and Digital Print & Chemicals. They develop, manufacture, and market analog and digital systems for the healthcare sector, for specific industrial applications, and for the printing industry. In 2024, the Group achieved a turnover of € 1,138 million.

About Agfa's Digital Printing Solutions

Agfa's Digital Printing Solutions aims to advance the use of inkjet printing technology across diverse industries, helping businesses become more versatile, efficient, and sustainable. By understanding the unique needs and challenges of each sector, Agfa partners with its customers to deliver innovative printing solutions.

Agfa offers a comprehensive range of high-quality inkjet printers, inks, software, and services. These products can be provided as fully integrated solutions or as customized components within larger production workflows, ensuring exceptional quality, productivity, and cost-effectiveness. With global service and support, Agfa helps businesses achieve outstanding printing results and drive growth.
