

Agfa's powerful inkjet printing beasts gallop into FESPA Barcelona

Agfa will bring a selection of its wide-format inkjet solutions to FESPA Barcelona this May, demonstrating how its fully renewed portfolio now offers a powerful printing beast for every need.

After several years of focused innovation across engines, inks, software, and automation, the company will show how its evolved portfolio now translates into measurable impact for print service providers – fully aligned with its *Powerful by Nature* branding.

At booth D100 in Hall 3, Agfa will showcase a strong selection of its wide-format systems, highlighting just some of the many configurations that can be tailored to different production environments.

The fully automated Onset Panthera flatbed press combines extreme speed with robust construction and minimal downtime and will be shown with its autoloader and unload robot to demonstrate maximum throughput potential.

Also on display is the Jeti Tauro H3300 UHS, part of Agfa's flagship Tauro family, delivering fierce performance with advanced automation options designed for continuous, high-volume output.

Making its European show debut is the Jeti Bronco H3300 HS, a hybrid wide format UV LED printer that seamlessly bridges the gap between the Ciervo and Tauro families on both speed and price. It delivers versatility, strong productivity, and premium print quality thanks to its seven -color plus white ink set and broad media-handling capabilities.

The Anapurna Ciervo H2500 adds further versatility with its hybrid design for rigid and flexible substrates up to 2.5 meters wide, engineered for precise, high-quality results. The latest release of Asanti workflow (v8) will also be demonstrated, introducing deeper automation, smarter media handling, extended cutter support, improved color rendering, and advanced job sorting and layout capabilities.

Across the booth, visitors will find a wide array of real application samples — including

prints on corrugated cardboard, folding carton, vinyl, banner, foam PVC and Agfa's own durable synthetic paper SYNAPS. This comprehensive showcase will highlight the creative possibilities, production quality, and commercial value enabled by Agfa's ecosystem.

Underscoring Agfa's commitment to helping print service providers navigate evolving market needs and select the configuration best suited to their goals, Agfa's inkjet specialists from sign & display, industrial, and packaging segments will be present throughout the show to discuss application development, sustainability improvements, ink advancements, workflow automation strategies, and long-term strategic investment considerations.

Vincent Wille, President Digital Printing Solutions at Agfa, said: "The past years have been defined by intensive innovation at Agfa: reinventing engines, expanding automation, evolving our software platforms, and strengthening our ink technologies. That investment has brought us to a new chapter. Today, our portfolio stands for more than innovation alone – it stands for impact. We now offer a complete, future-ready ecosystem that helps customers increase efficiency, broaden their application range, improve quality, and produce more sustainably. Yet we're not stopping here. Continuous improvement is built into our roadmap, with further enhancements across our engine families. At FESPA Barcelona, we invite visitors to experience how this evolution translates into real-world value and to discover which powerful beast fits their ambitions."

Agfa will be at FESPA Barcelona from 19-22 May 2026 in Hall 3, booth D100. Come, discover & engage – and find the beast that meets your needs.

About Agfa

The Agfa-Gevaert Group is a leading company in imaging technology and IT solutions with over 150 years of experience. The Group operates through three divisions: Radiology Solutions, Healthcare IT, and Digital Print & Chemicals. They develop, manufacture, and market analog and digital systems for the healthcare sector, for specific industrial applications, and for the printing industry. In 2024, the Group achieved a turnover of € 1,138 million.

About Agfa's Digital Printing Solutions

Agfa's Digital Printing Solutions aims to advance the use of inkjet printing technology across diverse industries, helping businesses become more versatile, efficient, and sustainable. By understanding the unique needs and challenges of each sector, Agfa partners with its customers to deliver innovative printing solutions.

Agfa offers a comprehensive range of high-quality inkjet printers, inks, software, and services. These products can be provided as fully integrated solutions or as customized components within larger production workflows, ensuring exceptional quality, productivity, and cost-effectiveness. With global service and support, Agfa helps businesses achieve outstanding printing results and drive growth.
