Charge ahead with the Jeti Tauro H3300 family at FESPA 2026

With the force of a raging bull, Agfa's Jeti Tauro H3300 family stampedes into FESPA 2026, bringing fierce performance and continuous, high-volume output to the global print expo.

Unleash Unstoppable Printing Power

The Jeti Tauro H3300 range is built to charge through long runs without losing its footing. Its sturdy construction, fast-firing heads and broad media compatibility make it the natural fit for businesses seeking one machine to shoulder the heaviest workflows without slowing. A true hybrid print powerhouse, each Tauro model can tackle 24/7 high-volume output with offset-like, award-winning print quality.

A Wide-Ranging Herd

The Tauro family – comprising the H3300HS, UHS, and XUHS models – offers a complete spectrum of heavy-duty printers engineered for nonstop performance. Each Tauro is built to thrive across rigid and flexible media, excelling at every task that comes its way. Whether it's sign & display, packaging, corrugated, backlit, POP, or even niche applications like wood, glass, and art reproduction, the Tauro dominates every challenge in its path.

- **Hybrid versatility:** Switch between rigid boards and roll-to-roll production with ease.
- **UV LED curing:** Energy efficient, cool-running UV lamps unlock printing on thin and heat-sensitive media.
- **4- and 7-color configurations:** Achieve vibrant images with excellent solids, smooth tonal transitions, and a perfectly neutral gray balance.
- **Supported by Thin Ink Layer technology:** Vivid color with impressively low ink consumption.
- **Optional white, primer & varnish:** Whether you need high opacity, strong adhesion, or luxury gloss finishes, the Tauro family has you covered.

Strength in Every Charge

- **Tauro H3300 HS:** With 6-row print head configurations, top speeds of 680 m²/h, and 4- or 7-color configurations, the HS model is perfect for growing print service providers that need more throughput without compromising quality.
- **Tauro H3300 UHS:** Making its European debut live at FESPA 2026, this ultra-high speed powerhouse pushes up to 905 m²/h with 4-or 7-color sets and advanced automation support. Its extended vacuum zone makes it especially formidable for cardboard and corrugated work.
- **Tauro H3300 XUHS:** The pinnacle of productivity, with 12 rows of print head, top speeds of 1,280 m²/h and 4- or 7-color configurations, it delivers unmatched throughput for industrial production environments.

Advanced Automation

The Tauro range is backed by a suite of automation options that keep production moving at full speed. While MAX Bots deliver robotic feeding and stacking at an industrial pace, the MAX Feeder and Stacker units ensure a smooth, uninterrupted flow of boards through long runs.

For fast changeovers, the Automatic Board Feeder offers effortless alignment and fast transitions between media. The MAX MASTER RTR module supports roll-to-roll printing with an undockable roll printing add-on, enabling near-unattended printing of very large and heavy single or dual rolls, up to 700kg/600mm. Meanwhile, MAX FLEX RTR handles single or dual rolls up to 450kg/400mm, making it ideal for heavy duty assignments involving single or dual rolls. MAX FLEX RTR can remain docked while input and output tables are attached over it, enabling seamless switching between rigid and flexible media.

These automation options combine to create a truly scalable, integrated environment that can adapt to any workflow, helping the Tauro family to run at its full potential around the clock.

Take the Bull by the Horns this FESPA

Agfa invites visitors to witness the Jeti Tauro H3300 UHS at FESPA Global Print Expo 2026. Visit Agfa at Hall 3, booth D100 to see live demonstrations and discover how its hybrid power can charge your business ahead.

Notes to editors

About Agfa

The Agfa-Gevaert Group is a leading company in imaging technology and IT solutions with over 150 years of experience. The Group operates through three divisions: Radiology Solutions, Healthcare IT, and Digital Print & Chemicals. They develop, manufacture, and market analog and digital systems for the healthcare sector, for specific industrial applications, and for the printing industry. In 2024, the Group achieved a turnover of € 1,138 million.

About Agfa's Digital Printing Solutions

Agfa's Digital Printing Solutions aims to advance the use of inkjet printing technology across diverse industries, helping businesses become more versatile, efficient, and sustainable. By understanding the unique needs and challenges of each sector, Agfa partners with its customers to deliver innovative printing solutions.

Agfa offers a comprehensive range of high-quality inkjet printers, inks, software, and services. These products can be provided as fully integrated solutions or as customized components within larger production workflows, ensuring exceptional quality, productivity, and cost-effectiveness. With global service and support, Agfa helps businesses achieve outstanding printing results and drive growth.
