

## **Roam freely across rigid and roll media with the Anapurna Ciervo H3200 at PRINTING United Expo 2026**

Break away from the herd at PRINTING United this year and discover the stunning versatility of Agfa's Anapurna Ciervo H3200. Built to move nimbly between jobs, this wide-format hybrid printer helps sign and display printers cover more ground across rigid and flexible media.

### **A sure-footed hybrid**

The Anapurna Ciervo H3200 is a true hybrid flatbed/roll-to-roll UV LED press, engineered to handle the full spectrum of sign and display substrates. With a maximum print width of 3.2m and draft-mode speeds up to 192 m<sup>2</sup>/h, this machine is built for shops that need to move quickly between jobs while keeping output consistent and high quality.

Continuous board feeding adds further speed on rigid work, with up to four boards printing simultaneously – ideal for high-volume tasks. On roll-to-roll jobs, the H3200 supports dual-roll printing up to 1.52m, giving businesses an extra layer of flexibility when running roll-fed work alongside rigid production.

### **Roam freely across applications**

The H3200 handles a wide range of indoor and outdoor applications with ease, from rigid exhibition panels to coated textiles. UV LED curing extends the printable substrate range to include thin, heat-sensitive media, opening the door to more specialized jobs while keeping energy consumption low.

Optional corrugated media guides let printers expand into corrugated board, packaging and point-of-sale production without investing in a new machine. They can be fitted at purchase or retrofitted onto machines already in the field, giving businesses a way to tap into new revenue streams without replacing their existing fleet.

White ink functionality adds another layer of creative freedom, with the H3200 supporting pre-white, sandwich white and post-white applications in a single run. Paired with borderless printing, which cuts down on post-finishing, the H3200 helps printers take on more value-added work with fewer handling steps.

## **Backed by smart workflow software**

Agfa's Asanti workflow software helps print shops get the most out of the H3200. Asanti streamlines the process from prepress to production with automated job creation, consistent color and full visibility of job status, ink and media consumption, helping maximize production efficiency while keeping output vibrant and consistent.

## **Discover the Anapurna Ciervo H3200 at PRINTING United Expo 2026**

The Anapurna Ciervo H3200 roams into PRINTING United Expo 2026 on Agfa's booth in the Central Hall. Visit Agfa to see the machine firsthand alongside a range of printed media and applications, offering a real-world look at what the H3200 can produce.

**Visit Agfa at booths C1149 and C1161, Central Hall, PRINTING United Expo 2026, to see the Anapurna Ciervo H3200 in action and speak with the Agfa team.**

## **Notes to editors**

### **About Agfa**

The Agfa-Gevaert Group is a leading company in imaging technology, with nearly 160 years of experience. Agfa develops, manufactures and markets analog and digital systems for the healthcare sector, for the printing industry, for the green hydrogen industry and for specific industrial applications. In 2025, the Group realized a turnover of 1,086 million euro.

### **About Agfa's Digital Printing Solutions**

Agfa's Digital Printing Solutions aims to advance the use of inkjet printing technology across diverse industries, helping businesses become more versatile, efficient, and sustainable. By understanding the unique needs and challenges of each sector, Agfa partners with its customers to deliver innovative printing solutions.

Agfa offers a comprehensive range of high-quality inkjet printers, inks, software, and services. These products can be provided as fully integrated solutions or as customized components within larger production workflows, ensuring exceptional quality, productivity, and cost-effectiveness. With global service and support, Agfa helps businesses achieve outstanding printing results and drive growth.
