

Make every print minute count with Asanti 8 at PRINTING United Expo 2026

Put smarter workflow at the heart of production with Agfa's Asanti 8 at PRINTING United Expo 2026. The latest evolution of Agfa's wide-format workflow software connects prepress, color management, print and finishing in one system, cutting waste and shortening the path from file to finished job.

A connected production hub

Asanti is an automated wide-format production hub that brings prepress, color management, job preparation, print production, and finishing together in a single centralized environment. By removing the manual handoffs and checks that typically slow production down, sign and display printers gain access to a more predictable, repeatable path from approved artwork to finished print.

- Automated PDF preflighting and file preparation: catch mistakes before they reach the printer
- Pre-calibrated print modes: reduce manual fine-tuning
- Color management: maintain accuracy across substrates
- Nesting and tiling: automate layout for efficient media use
- Centralized dashboard: gain real-time visibility of job status, ink, and media consumption to quickly spot and resolve bottlenecks

Smarter media and job preparation

Asanti 8 builds in further automation and smarter media handling to help operators keep pace with increasingly complex production demands.

New Hot Ticket Functionality, including auto-placement and snapping, automates layout preparation and cuts down on the operator input jobs would otherwise require, minimizing material waste on work that would previously have needed manual arrangement.

Color handling has also moved forward, with improved Pantone® rendering delivering better matching on out-of-gamut colors and stronger hue preservation, so brand and spot colors stay consistent and accurate across a wider color range.

On the finishing side, Asanti 8 deepens its integration with the Fotoba XL cutter series, adding automated barcode generation for fully hands-off cutting set-up.

See the software

At PRINTING United Expo 2026, Agfa is showcasing Asanti 8 running alongside the Jeti Tauro H3300 XUHS on its booth in the Central Hall. Visitors will get a hands-on look at how Agfa's hardware and workflow software are engineered as a single system – from file intake through to finished output – rather than two products bolted together.

Visit Agfa at booths C1149 and C1161, Central Hall, PRINTING United Expo 2026, to see Asanti 8 in action and speak with the Agfa team.

About Agfa

The Agfa-Gevaert Group is a leading company in imaging technology, with nearly 160 years of experience. Agfa develops, manufactures and markets analog and digital systems for the healthcare sector, for the printing industry, for the green hydrogen industry and for specific industrial applications. In 2025, the Group realized a turnover of 1,086 million euro.

About Agfa's Digital Printing Solutions

Agfa's Digital Printing Solutions aims to advance the use of inkjet printing technology across diverse industries, helping businesses become more versatile, efficient, and sustainable. By understanding the unique needs and challenges of each sector, Agfa partners with its customers to deliver innovative printing solutions.

Agfa offers a comprehensive range of high-quality inkjet printers, inks, software, and services. These products can be provided as fully integrated solutions or as customized components within larger production workflows, ensuring exceptional quality, productivity, and cost-effectiveness. With global service and support, Agfa helps businesses achieve outstanding printing results and drive growth.
