September 2026

Jeti Bronco H3300 HS

Range free across any task with Jeti Bronco H3300 HS, which gallops into PRINTING United Expo 2026 this September. Purpose-built for sign shops and digital printers, this wide-format hybrid inkjet press offers exceptional flexibility, productivity and print quality on both rigid and roll media.

The Jeti Bronco H3300 HS is a true workhorse in any pressroom. With a 3.3m print width and productivity up to 450 m²/h, the Bronco HS offers enough muscle to keep pace with the most demanding production schedules. A seven-colour CMYKcmk plus white configuration strengthens light and mid-tone reproduction and deliver a wide colour gamut, so output stays vibrant and consistent across a broad mix of jobs

Unbridled versatility

The Bronco HS moves between substrates without missing a beat. Single-roll printing supports media up to 3.3 wide while independent dual-roll production works up to 1.6m. On rigid jobs, continuous board feeding lets the next board load while another is still printing, with up to four boards running simultaneously to keep high-volume production moving. Borderless printing further trims down post-finishing requirements, adding another layer of efficiency to the workflow.

UV LED curing broadens its application range into thin heat-sensitive materials like films or microflutes, while optional corrugated media guides extend the system into corrugated board, packaging and point of sale applications. enabling printers to take on new territory as required. Meanwhile, white ink functionality opens up pre-white, sandwich white and post-white production in a single run, unlocking opportunities across transparent, colored, and backlit applications.

Bred from Tauro stock

The Bronco HS draws on printer technology and a graphical user interface based on Agfa's renowned Jeti Tauro platform, giving operators an industrial production

experience and a familiar interface. Because the interface is standardised across Agfa's high-end UV printing systems, operators can move between machines on the production floor without a steep learning curve.

Underneath, automated media registration, four-zone vacuum control, tension management and smart ink handling keep day-to-day production reliable and consistent. Agfa's Asanti workflow software complements this by integrating with the printer to support job handling, colour management and consistent image quality from file to finished output.

See the Bronco in action at PRINTING United Expo

The Jeti Bronco H3300 HS will be demonstrated at PRINTING United Expo as part of Agfa's wider industrial inkjet portfolio. Visitors will get a firsthand look at how the press supports hybrid media flexibility with major productivity enhancements, all while retaining Agfa's renowned print quality.

Visit Agfa at booths C1149 and C1161, Central Hall, PRINTING United Expo 2026, to see the Jeti Bronco H3300 HS in action and speak with the Agfa team.

Notes to editors

About Agfa

The Agfa-Gevaert Group is a leading company in imaging technology, with nearly 160 years of experience. Agfa develops, manufactures and markets analog and digital systems for the healthcare sector, for the printing industry, for the green hydrogen industry and for specific industrial applications. In 2025, the Group realized a turnover of 1,086 million euro.

About Agfa's Digital Printing Solutions

Agfa's Digital Printing Solutions aims to advance the use of inkjet printing technology across diverse industries, helping businesses become more versatile, efficient, and sustainable. By understanding the unique needs and challenges of each sector, Agfa partners with its customers to deliver innovative printing solutions.

Agfa offers a comprehensive range of high-quality inkjet printers, inks, software, and services. These products can be provided as fully integrated solutions or as customized components within larger production workflows, ensuring exceptional quality,

productivity, and cost-effectiveness. With global service and support, Agfa helps businesses achieve outstanding printing results and drive growth.
