

Meet Agfa's fiercest hybrid beast as the Jeti Tauro H3300 XUHS charges into PRINTING United 2026

Unleash your productivity at PRINTING United Expo this September as Agfa's Jeti Tauro H3300 XUHS stampedes onto the show floor. This ultra-fast hybrid press combines robotic board handling and roll-to-roll production all in one platform, providing the mix of rugged reliability and cutting-edge automation today's printers need to keep production charging ahead.

Trample the manual work

The range of automation features on the Jeti Tauro H3300 XUHS grants flexibility that other hybrid printers cannot match. From automatic board feeders to fully automated loading and unloading systems, as well as robotic media handling with MAX BOT robots, the Tauro can be optimized for almost any sign and display or packaging job.

- **MAX BOT Robots:** Robotic media handling can fully automate loading and unloading, while managing up to 150 load cycles per hour across sheets, corrugated, and rigid boards. Laser alignment sensors ensure accurate registration while a dedicated touchscreen provides precision control over stack setup, suction zones, and vacuum settings.
- **MAX Flex RTR Module:** This module handles heavy-duty single or dual rolls up to 450 kg and 400 mm in diameter, and stays docked to the press at all times. Input and output tables simply attach over it, enabling operators to switch quickly between rigid and roll-fed media without losing uptime. An input balancing roll keeps tension constant for wrinkle-free output, while an optional back-to-front camera supports accurate double-sided roll printing.

Rugged reliability

Like a stampeding bull, the Tauro H3300 XUHS is unstoppable once it gets moving. Designed for demanding 24/7 production, this press reaches speeds of up to 1,280 m²/h across rigid and flexible media, powered by 12 rows of printheads in four- or seven-color configurations, with white, primer and varnish options for added finishing power. Whether producing signage, POP displays, exhibition graphics, corrugated board or packaging, the XUHS offers the productivity that high-volume print businesses

depend on.

Print quality never takes a back seat to speed as the XUHS delivers output up to 1,200 dpi, with accurate spot colors, a neutral gray balance and outstanding solid color reproduction. The result is print quality with the fine details and smoothness of offset, all from a digital press.

See the Jeti Tauro H3300 XUHS at PRINTING United 2026

Visit Agfa in the Central Hall at booths C1149 and C1161 at PRINTING United Expo 2026 to see the Jeti Tauro H3300 XUHS in action. Attendees can watch the press operating with its dual MAX BOT robots and MAX Flex RTR configuration in a practical demonstration of how high-speed printing and automation can work together across both rigid and roll-fed production.

Discover the power of the Jeti Tauro H3300 XUHS at PRINTING United Expo this September – talk to the Agfa team to find out more.

Notes to editors

About Agfa

The Agfa-Gevaert Group is a leading company in imaging technology, with nearly 160 years of experience. Agfa develops, manufactures and markets analog and digital systems for the healthcare sector, for the printing industry, for the green hydrogen industry and for specific industrial applications. In 2025, the Group realized a turnover of 1,086 million euro.

About Agfa's Digital Printing Solutions

Agfa's Digital Printing Solutions aims to advance the use of inkjet printing technology across diverse industries, helping businesses become more versatile, efficient, and sustainable. By understanding the unique needs and challenges of each sector, Agfa partners with its customers to deliver innovative printing solutions.

Agfa offers a comprehensive range of high-quality inkjet printers, inks, software, and services. These products can be provided as fully integrated solutions or as customized components within larger production workflows, ensuring exceptional quality, productivity, and cost-effectiveness. With global service and support, Agfa helps businesses achieve outstanding printing results and drive growth.
